

A LETTER TO PARENTS

Dear Parents:

As parents one of our most important concerns we have is the education of our children. At the library, it is our goal to be a vital partner in the intellectual development of all the children of our community.

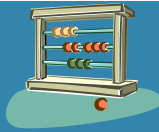

To that end, we have developed our second publication in the First Experiences series. This edition focuses on the development of mathematics skills. Resources are listed in three separate bibliographies. Each concentrates on an individual skill level. Toddlers to early elementary students begin with the First Introduction bibliography. Elementary students concentrate on the Younger Children's bibliography. Later Elementary through Middle School students use the bibliography labeled Older Children.

We hope that this publication will assist you and your children and provide them with the opportunity to make the most out of their educational experience.

Sincerely,
Cindy Wall, M.L.S.
Children's Librarian
